

Quagga and Zebra Mussel-Free Certification Save Time and Self-Certify!

You are required to comply with Glen Canyon National Recreation Area's quagga and zebra mussel prevention program before you may launch your boat into Lake Powell. For most boaters, this will be a simple process.

Here's what you need to do before you can launch:

- Look at the questions on the other side of this page.  (Over)
- If your answers to these questions tell you to get your boat professionally decontaminated before launching in Lake Powell, you must do so!
- If your boat is ready to launch now, just complete the self certification statement. **Be sure to display the certificate on your dashboard while your vehicle is parked in Glen Canyon National Recreation Area!** You can use the certificate all summer long, but you must ensure that your boat is clean each time you launch in Lake Powell. Don't let mussels hitchhike on your boat!

In January 2007, quagga mussels were discovered in Lakes Mead, Mohave, and Havasu. This is the first time zebra or quagga mussels have been discovered west of the Rocky Mountains. Zebra and quagga mussels have already invaded much of the Eastern U.S.

Quagga and zebra mussels can be spread by your boat, but they cannot live out of the water for long periods of time. Simply washing boats and equipment and allowing it to fully dry is an effective way to reduce the risk of spreading these aquatic hitchhikers.

Zebra mussels and other harmful plants and animals may be hiding under your trim tabs, in your engine, or even on your anchor chain! Quagga and zebra mussels are microscopic in their earliest life stages, making them impossible to detect with a visual inspection.

Quagga and zebra mussels have the potential to:

- Disrupt the food chain and fishing
- Foul facilities like docks and ramps
- Encrust boats and clog engines
- Litter beaches with sharp smelly shells

If you have any questions, check with a park ranger or call 928- 608- 6404.

Mussel Decontamination Stations in Glen Canyon

Antelope Point Decontamination Station is located in the Antelope Point Marina Maintenance Yard. An escort is required, check-in at the entrance station.

Bullfrog Decontamination Station is located across the road from the Sinclair gas station approximately one mile southwest of the entrance station.

At Halls Crossing, continue north on Hwy 276 past the marina and take a left to enter the dry boat storage yard. Go into the dry boat storage office in order to redeem your boat wash coupon.

Quagga/Zebra Mussel Prevention Program

This Certificate Must Be Placed
On Your Dashboard

MUSSEL FREE

Failure to display this certificate on the dashboard of your vehicle while parked with an empty boat trailer could result in a citation

Quagga and zebra Mussels Pose a Major Threat to Lake Powell!

Mussels in Lake Powell could:

- Disrupt the food chain and fishing
- Foul facilities like docks and ramps
- Encrust boats and clog engines
- Litter beaches with sharp smelly shells

These invasive species from Eastern Europe are spreading at a fast rate across the United States. They are transported to new areas attached to boats or harbored in tiny amounts of water.

**I affirm that my vessels do not threaten Lake Powell
with quagga or zebra mussels.**

Please check one: Boat not used in last 30 days in infested waters
 Boat washed and allow to completely dry for at least 5 days

Signature: _____ Date: _____

**Thank you for protecting
Glen Canyon National Recreation Area!**
